EXPLORE THE NEW MINI ELECTRIC.

An icon reimagined – the first fully electric MINI is here. The new MINI Electric is the best of both worlds, giving you the iconic character of MINI with all the benefits of going electric.

Following its ground-breaking launch in 1959, MINI established itself as the definitive go to small car and the MINI 3-door Hatch is now the first available with a fully electric powertrain. Emitting zero emissions, the new MINI Electric is the perfect combination of sustainable driving, thrilling driving performance and iconic MINI design. The new MINI Electric is reinventing urban life.

Putting the smart into sporty, every inch of this car has been specially developed to improve performance. The perfectly streamlined design balances weight and agility, resulting in optimised aerodynamics. This is head turning efficiency. This is the electric car that gets people talking.

1 These figures were obtained after the battery had been fully charged. The new MINI Electric is a battery electric vehicle requiring mains electricity for charging. There is a new test for fuel consumption, CO2 and electric range figures. The electric range shown was achieved using the new test procedure. Figures shown are for comparability purposes only. Electric range figures do not correlate to the engine size in the conventional sense.

2 These figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, accessories fitted (post-registration), variations in weather, driving styles and vehicle load.

3 The CO2 figures have been determined according to the WLTP test. WLTP has been used as the applicable CO2 figure from 1 April 2020 for first year vehicle tax (VED) and from 6 April 2020 for company car tax (BIK). The CO2 figures were previously based on the NEDC equivalent.

4 Charging time corresponds to an 80% charge. Charging times are approximate and may vary depending on various factors such as the type and condition of the charger and the temperature of the battery at the point of use. A 100% charge is achieved in 1 hour 24 minutes.

5 A 100% charge is achieved in 3 hours 12 minutes. **Including Online Search and Weather Information**

STANDARD EQUIPMENT HIGHLIGHTS.

**EXTERIOR:**
- LED lights (front and rear)
- Choice of solid or metallic exterior paint colours
- Choice of 16" or 17" alloy wheels
- MINI e-badge
- Unique aerodynamically enhanced front and rear bumpers
- Front grille with unique MINI Electric design and tailgate handle in Vigorous Grey

**INTERIOR:**
- Design highlights in Energetic Yellow
- Carbon Black Colour Line

**INFOTAINMENT:**
- MINI Navigation System
- MINI Connected
- Real Time Traffic Information (RTTI)
- Apple CarPlay
- Remote Services
- ConnectedDrive Services (including Online Services and Weather Information)
- Intelligent emergency calling (E-call)
- MINI Teleservices
- Drive services variable to initialise charging, monitor charging status and issue public charging station list

**FUNCTIONAL EQUIPMENT:**
- Fully digital display cockpit (15’’ digital instruments cluster integrated into a larger display set behind the steering wheel)
- Automatic dual zone air conditioning
- AC and DC charging
- AC home (occasional 3-pin plug) charging cable (type 2 – 2.3 kW)
- AC public charging cable (type 2 – 11 kW)
- Electric parking brake
- Automatic transmission
- MINI Driving Modes (centre toggle switch to control driving mode settings: Sport, Mid, Green, Green+; allows adaption to different driving situations and ensures a high driving efficiency and the optimal driving range)
- Two levels of power regeneration (energy recovery toggle which allows the driver to alter the severity of automatic braking when releasing the throttle by changing the amount of energy being regenerated when coasting)
- Pre-conditioning: ensures heats or cools the vehicle prior to departure through the MINI Connected app
- Acoustic protection
- Cruise control with brake function
- Front and rear ISOFIX child seat attachment
- Rain sensor and automatic headlight activation

The new MINI Electric is available with different levels of equipment, for more information about the equipment available with each level please click here.
PRICING.

THE NEW MINI ELECTRIC.

HOW MUCH DOES IT COST TO OWN THE NEW MINI ELECTRIC?

FINANCIAL PERKS.

The government currently offers £3,000** towards your new MINI Electric as it’s classed as a low-emission vehicle. Plus, if you’re considering the MINI Electric as your company car, it will have a BIK tax rate of 0% for the year 2020/21.

CHARGING COSTS.

The cost per mile for the new MINI Electric is only 4p, which is 2.5 to 6 times cheaper than cars with a petrol or a diesel engine.1

SERVICING MADE SIMPLE.

With the MINI Electric Pay Monthly Service Plan3 you can remove the uncertainty often associated with servicing costs by apraching them monthly.

<table>
<thead>
<tr>

</tbody>
</table>

Our flexible Service Plan is designed specifically for MINI Electric, can be transferred to another MINI and can also be purchased online.

PRICES AND SPECIFICATIONS

MINI UK reserves the right to alter prices and specifications without notice. MINI UK has made every effort to ensure the accuracy of information but does not accept liability for any errors or omissions.

ON THE ROAD PRICE

The recommended On The Road price is based on the Recommended Retail Price (RRP) and On The Road charges. OTT charges include:

- Delivery and Emergency Service £500
- Number plates £25
- Vehicle first registration fee £55
- Vehicle Excise Duty See below

VED RATES

VED rates for brand new cars are determined by their CO₂ emissions figures. First year VED applies to the first year of ownership. Annual VED rates apply thereafter.

<table>

¹ Source: Zap-Map. †† The Wallbox is not included in the price of the car, it has to be purchased separately.
² Charging time corresponds to an 80% charge. Charging times are approximate and may vary depending on various factors such as the type and condition of the charger and the temperature of the battery at the point of use.
³ A 100% charge is achieved in 3 hours 30 minutes. 74.9% charge is achieved in 1 hour 30 minutes.

**PARTNERSHIP WITH BP CHARGEMASTER.**
Thanks to the BP Chargemaster Polar Plus network with over 7,000 charging points, you will be able to easily charge up your car at Public Charging points using both AC and DC chargers. For home charging feel free to choose a MINI Wallbox or the BP Chargemaster homecharge unit.

*These figures were obtained after the battery had been fully charged. The new MINI Electric is a battery electric vehicle requiring mains electricity for charging. There is a new test for fuel consumption, CO2, and electric range figures. The electric range shown was achieved using the new test procedure. Figures shown are for comparability purposes. While compare fuel consumption, CO2, and electric range figures with other recharged in the same technical procedures. The CO2 figures have been determined according to the WLTP test. NEDC has been used as the applicable (CO2 figures were previously based on the NEDC equivalent. These figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, accessories fitted (post-registration), variations in weather, driving styles and vehicle load.
