THE ORIGINAL MINI REBORN.

Welcome the MINI Hatch. The true original and the one that started it all. The MINI Hatch is striking and showcases its legendary DNA more proudly than ever. Distinctively modern, it comes equipped with an extensive list of standard features. Compact on the outside, with short overhangs, plus loads of space inside – it’s as fun to drive today as it was back in 1959. On winding country roads it handles like a go-kart. It also has a small turning circle, which is handy for nimble manoeuvring in the concrete jungle. The MINI Hatch is made to enjoy urban life to the full.

ONE

The 1.5-l 3-cylinder petrol engine delivers 102 hp/75 kW and features MINI TwinPower Turbo technology. It comes with a matt black safety bar and tailgate handle as well as high-gloss black radiator grille fins. The go-kart feeling starts here.

With a 2.0-l 4-cylinder petrol engine (231 hp/170 kW), the John Cooper Works packs the biggest punch. The standard John Cooper Works aerodynamic kit includes front and rear bumpers with sporty John Cooper Works styling and part-painted side sills which underline the John Cooper Works heritage.

COOPER

A 1.5-l 3-cylinder petrol engine (136 hp/ 100 kW) offers a handy blend of power and fuel economy. It hosts a safety bar, tailgate handle and radiator grille fins in high-gloss black and exhaust tailpipes in Chrome.

COOPER S

To really take things up a gear, climb aboard the MINI 3-door or 5-door Hatch Cooper S. Under the bonnet it boasts a 2.0-l MINI TwinPower Turbo 4-cylinder engine that generates 192 hp/141 kW. The air intakes in the front bumper and the air scoop in the bonnet, rear apron with diffuser and central twin exhaust tailpipe all hint at the power waiting to be unleashed on the road.

^{*} Figures are for comparison purposes and may not reflect real life driving results which depend on a number of factors including the accessories fitted (post registration), variations in weather, driving styles and vehicle load. All figures were determined according to a new test (WLTP). The CO₂ figures were translated back to the outgoing test (NEDC) and will be used to calculate vehicle tax on first registration. Only compare fuel consumption and CO₂ figures with other cars tested to the same technical procedure. Figures vary within the range depending on the style selected and the optional equipment fitted.
