

SWINDON PRESSINGS LTD. 2019 GENDER PAY GAP REPORT.

BMW Group Plant Swindon produces body pressings and sub-assemblies for MINI. At the time of the reporting period, Swindon Pressings Ltd employed 679 people at its site in Wiltshire.

WHAT IS THE GENDER PAY GAP?

The Gender Pay Gap is the difference between the average pay and bonuses of all men and women across an organisation.

The Gender Pay Gap does not measure equal pay, which relates to what women and men are paid for performing equal work.

OUR RESULTS.

The Gender Pay Gap Data for Plant Swindon on 5 April 2019 is as follows;

MEAN AND MEDIAN PAY AND BONUS GAP		
	MEAN (average)	MEDIAN (Middle)
Gender Pay Gap	17%	10.9%
Gender Bonus Gap	18%	-0.6%

PROPORTION OF EMPLOYEES WHO RECEIVED A BONUS:

SALARY QUANTILES.

The proportion of males/females in each quartile pay band is as follows:

SWINDON PRESSINGS LTD. 2019 GENDER PAY GAP REPORT.

UNDERSTANDING THE GAP.

As is typical of many manufacturing companies, our workforce is comprised of considerable more men than women. At Swindon Pressings Ltd. our employees are 96% male and 4% are female.

There are a number of factors which drive our Gender Pay Gap results, however we have identified 3 key areas;

1. Working patterns. There is a higher proportion of men working in production and engineering roles who operate on shift patterns which attract a shift premium payment.

2. Women in Senior Leadership Roles. We currently have very few women in leadership roles at Swindon Pressings Ltd.

3. Part time roles. There is a higher proportion of women than men who work part time. Whilst this has no impact upon a women's hourly basic pay, it does impact other elements of total remuneration, including bonus payments.

2017-2019.

Over the last three years of publishing our results, we have seen both improvements and deteriorations in our results. We now understand and recognise that year on year our gender pay gap figures may be inconsistent for a number of reasons. Primarily we will continue to be vulnerable to any changes in our small female population and any internal movements around our UK and global network, but our calculations can also be impacted by exceptional events such as the prolonged Plant shutdown we saw in April 2019. However what undoubtedly will be consistent is our commitment to attracting and developing the best talent and ensuring that all our associates have the opportunity to fulfil their potential.

CLOSING THE GAP.

Across the BMW Group we recognise that Diversity and Inclusion is our strength and is crucial to our ability to perform effectively and will undoubtedly ensure the long term success of our Company.

We are focused on building a diverse and inclusive work environment but we are realistic that meaningful change will take some time in our industry.

In 2019 we continue to raise the profile of inclusivity in the workplace, with a specific focus on unconscious bias and leadership training.

We also continue to take a number of approaches which specifically focuses on improving our ability to attract, engage and develop women. For example;

'Girls Go Technical' programme: Aimed at girls between the ages of 15–24 who are considering a technical apprenticeship within the manufacturing industry.

For 2020 the introduction of **'In the Driver's Seat'** – A focus on female manager's networking to focus on career progression and maternity mentoring.

In addition, we continue to work with the enei (Employer's network for Equality and Inclusion) to help us on our diversity journey and support our long term diversity goals.

We continue to support the UK Government's drive for companies to be more transparent on gender pay issues and confirm that the data is accurate and in line with The Equality Act 2010 (Gender Pay Gap Information) Regulations 2017.
